WELCOME

Over the course of 26 years Alpine Angus has consistently strived to produce fault-free, true-to-type animals that can add value to the herds they are used in.

The stud, which was established by Jim Delany, in 1998, and managed by Chris Oswin since 2010 has focused on producing honest, reliable cattle bred from the basics up.

Alpine Principal Jim Delany 'The Alpine herd has progressed in leaps and bounds under Chris Oswin's management. This is due to Chris's dedicated focus on pursuing genetics to produce fault-free, responsibly framed cattle with fleshing ability, good temperament, and consistency combining EBVs promising calving ease and explosive growth.'

Alpine Angus will host their 9th Spring Bull Sale on Wednesday 18 September at 1pm at the Alpine Sales Complex at Rosewhite offering 55 2-year old and 18-month old bulls.

Alpine Principal Mr Delany said, 'The outlook for seasonal and market conditions seems so much more positive

than last year with the threat of El Niño receding and the unexpected widespread summer rainfall.

Alpine Manager Chris Oswin, 'All lots catalogued for the sale are sound, well-balanced bulls and pleasingly represent a range of genetics from our herd incorporating different sirelines and cow families.'

Within the 52 lot draft of 2-year old and 18-month bulls selected for the sale are sons of USA AI Sires Sterling Bond 007 and Sitz Stellar 726D together with Australian Sires Karoo Main Event M367 and homebred Alpine Knockout Q211.

Chris Oswin, 'All of these sires share great structural soundness with a phenotype displaying muscle and volume. The lineup also includes sons of Banquet Quarter Pounder Q252 and Alpine Richochet R005 who offer a bigger frame and high growth. There are also sons of Murdeduke Quarterback Q011, Alpine Junior M205 and Alpine Real Deal R163 who will appeal to clients chasing higher IMF. Our focus on soundness is well reflected by the fact that Stellar, Main

Event, Q211, Richochet and Real Deal all have Foot EBVs in the Top 15 % of the breed.'

Mr Oswin said in recent years the Alpine article has gained widespread industry acceptance with Alpine Main Event Q192, Alpine Rip Wheeler R144, Alpine Real Deal R163, Alpine Ronaldo R232, and Alpine 38 Special S021 all featuring in mainstream AI catalogues.

'While this wasn't the objective, as our clients are our prime focus, it's a rewarding, albeit humbling outcome.'

Alpine will host an open day on Sunday, 15 September from 11am to 3pm at the Alpine Sales Complex, for interested parties to inspect the bulls selected for the sale. On sale day the bulls will be yarded by 10am.

Those who are unable to attend the sale in person can bid from home via the AuctionsPlus online platform.

All the best,
Jim Delany *Principal*
Chris Oswin *Manager*

SALE INFORMATION

OUR QUALITY ASSURANCE

All Sale bulls must complete the following before being deemed suitable to be offered for sale:

- Semen quality test and physical inspection by Haydn Shipard.
- Independent structural assessment by Ian Moreland from Studcare Genetics.
- All bulls sire verified.
- Performance recorded HBR or APR with Angus Breedplan.
- 7-in-1 vaccination (2 initial and then annually).
- Vibrio vaccination (2 initial and then annually).
- Sale bulls drenched just prior to sale day. Please refer to the NVD.
- Tested PI negative plus Pestiguard vaccination (2 initial and then annually).

ALPINE BACK UP SERVICE

As our Quality Assurance program outlined above demonstrates Alpine Angus have made every effort to ensure Alpine Sale Bulls leave Alpine as fully functional bulls ready to go straight to work!

As our many long term clients will vouch for – Alpine Angus have worked hard over 26 years to service our clients however we can – particularly when things go wrong! Depending on the situation and circumstances various solutions may apply including the loan of a bull; a suitable replacement bull or a full or part credit. Our promise is to work with our clients to find the best solution.

***Please contact us if any problems arise as we endeavour to have spare bulls on hand throughout the joining season to assist clients with injury or other issues.**

Videos and details of all sale bulls will be available online on the Auctions Plus and Angus Australia websites. Sale Day there will be a live audio interface on line to allow for off site bidding

GST

All bulls are sold GST exclusive.

TRANSFER OF REGISTRATION

All bulls will be transferred on the Angus Australia Register. If you have an Angus Society prefix, please provide it when registering.

PRE-SALE INSPECTION

Pre-sale Inspection of Sale Bulls available on Sunday, 15 September from 11am–3pm at the Alpine Sales Complex, Rosewhite. Private inspections prior to sale day by appointment are welcomed. Sale Bulls will be yarded by 10am on Sale Day Wednesday 18 September at the Alpine Sales Complex, Rosewhite.

CATERING

Rosewhite CWA will be providing their excellent catering experience! Please come and enjoy the legendary morning tea and beef lunch they turn out!

Coffee provided by Sixpence Coffee Roasters, Bright. www.sixpencecoffee.com.au

OUTSIDE AGENT REBATE FOR BULL SALE

A 5% Rebate will be paid ONLY to those outside agents who ACCOMPANY buyers to the sale OR to those who INTRODUCE BUYERS IN WRITING 24 hours prior to the sale.

A 2% Rebate will be paid to Agents who handle the sale transaction only.

FREE FREIGHT & DELIVERY

The purchase price paid for bulls includes free delivery by Alpine Angus up to 250km by road from the Alpine Sales Complex. Please note every effort will be made to ensure that delivery will take place within 2 weeks of sale day. Buyer co-operation in co-ordinating delivery is greatly appreciated. Outside of this we will endeavour to assist in any way we can. If bulls are needed ASAP, please let us know.

GENETIC CONDITIONS AND GENOMICS

All bulls in this catalogue are free of known genetic defects through testing or pedigree.

All bulls in this catalogue have at a minimum been sire verified and have genomically enhanced EBVs.

Lots 21, 22 and 24 will have EBVs updated next TACE run.

DISCLAIMER

Whilst all care and attention has been paid to accuracy in the compilation of this catalogue, neither the vendors, selling agents or representatives thereof assume any responsibility whatsoever for the correctness, use or interpretation of the information on animals included in this sale catalogue.

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

GOING FURTHER®

THE ALPINE ANGUS LEGACY

1. ALPINE REAL DEAL R162 CGKR162
FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5
Semen marketed by ABS. Top priced bull 2022 Autumn Sale, purchased by Harris Thompson, Venturon Livestock and Taimate Angus NZ. Deep-bodied, high IMF NORN542 son. Dam by Longshot out of a full sister to Alpine Muzza & Alpine Elevator M268.

2. KAROO MAIN EVENT NENM367
FC 5 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5
Top-priced bull at the 2018 Karoo Bull sale, a calving-ease Sire with impeccable structure and outstanding feet. Sons sold to \$75,000. Progeny Alpine Rip Wheeler R144 and Alpine Main Event Q192 are both AI sires for Genetics Australia.

3. BANQUET QUARTER POUNDER Q252 VONQ252
FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5
Semen sire and \$60,000 top-priced bull at 2022 Banquet Bull Sale, Quarter Pounder sires long, growthy cattle with frame & strong heads.

4. ALPINE RIP WHEELER R144 CGKR144
FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5
Main Event son – our top-priced bull in 2021 Spring Sale, selling to Peter Collins and Luke Graham. Strong, well-balanced elite combination of Birth, Growth spread plus high fat cover. Semen sire for Genetics Australia currently one of their highest volume semen sellers!

5. ALPINE MUZZA M245 CGKM245
FC 5 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5
Retained by Alpine for his excellent type and temperament, Muzza throws quiet, true-to-type Angus with fleshing and depth. Full brother Alpine Elevator M268 topped our sale in 2018 and their sister is the grandam of Alpine Real Deal R163, also featured on this Legacy page. Sons have sold to \$28,000.

6. ALPINE ELEVATOR M268 CGKM268
FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 4
Top-priced bull at our 2018 Autumn Sale, selling to Wes Hall, Tasmania. Full ET brother to Alpine Muzza M245. Elevator M268 sires sound, powerful sons with presence. Two sons, S049 and R205 are featured. Sons have sold to \$52,000.

7. ALPINE PABLOS PULSE P348 CGKP348
FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5
Pablos Pulse has proven to be a sure-fire Calving Ease sire, producing light born calves with growth and vigour. Sons have made to \$25,000. Sired by Te Mania Long Shot, like Rip Wheeler he is out of a Sterita Park Black Jack daughter. 4 sons in this years sale.

8. ALPINE JUNIOR M205 CGKM205
FC 6 / RC 5 / FA 6 / RA 5 / RS 5 / RH 5
Coonamble Junior son we used as a mature bull to add to the carcass traits of our herd. Sons sold well in Autumn Sale. 4 sons in this sale.

12.

13.

14.

9. ALPINE ELEVATOR R205 CGKR205

FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 4

2nd top priced bull from our 2022 Autumn Sale, selling to Arden Angus, Adelong NSW. Big bodied, quiet M268 son with tremendous growth, plenty of fleshing and strong carcass attributes.

10. ALPINE ELEVATOR S049 CGKS049

FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5

2nd top priced bull from our 2022 Spring Sale selling to Cascade Angus, Tamworth. Big bodied M268 son with great thickness.

11. ALPINE QUARTERBACK S431 CGK215431

FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5

Top priced bull 2023 Autumn Sale, purchased by Wes Hall, Tasmania. Long-bodied Quarterback son with massive Birth to Growth spread and Carcass credentials. Used in our AI program.

12. ALPINE PABLO S471 CGK215471

FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5

One of three top-priced bulls from our 2023 Spring Bull sale, purchased by long-time supporter James Tehan, Wappan Pastoral, Mansfield. Big Growth, moderate Birth Pablos Pulse son.

13. ALPINE 38 SPECIAL 5021 CGKS021

FC 5 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5

This ST Genetics semen sire was our top priced bull from the 2022 Spring Sale at \$120,000 selling to Arkle Angus W.A. S021 is a strong bodied 38 Special son with excellent structure and EBVs.

14. ALPINE RONALDO R232 CGKR232

FC 5 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5

Super sound, long bodied N542 son with Calving Ease, low Birth and high Carcass credentials. Purchased by Brad Cavanagh, Hardhat Angus with semen marketed by ST Genetics Australia.

15. ALPINE NEXT GEN R272 CGKR272

FC 6 / RC 6 / FA 5 / RA 5 / RS 6 / RH 5

Flush brother to Ronaldo and Rock Solid, this low Birth, heavy bodied sire was one of our high sellers in the 2021 Spring sale selling to Dulverton and Five Star Angus studs, NSW.

16. ALPINE ROCK SOLID R289 CGKR289

FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5

Purchased by JB Angus as one of our high sellers at the Autumn 2022 sale, Rock Solid rounds off an amazing set of three flush brothers from the incredible breeding female, CGKM152.

UNDERSTANDING ESTIMATED BREEDING VALUES (EBVs)

| | | | | |
|--------------------|------------|-----------------|---|--|
| Calving Ease/Birth | CEDir | % | Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers. | Higher EBVs indicate fewer calving difficulties in 2 year old heifers. |
| | CEDtrs | % | Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age. | Higher EBVs indicate fewer calving difficulties in 2 year old heifers. |
| | GL | days | Genetic differences between animals in the length of time from the date of conception to the birth of the calf. | Lower EBVs indicate shorter gestation length. |
| | BW | kg | Genetic differences between animals in calf weight at birth. | Lower EBVs indicate lighter birth weight. |
| Growth | 200 Day | kg | Genetic differences between animals in live weight at 200 days of age due to genetics for growth. | Higher EBVs indicate heavier live weight. |
| | 400 Day | kg | Genetic differences between animals in live weight at 400 days of age. | Higher EBVs indicate heavier live weight. |
| | 600 Day | kg | Genetic differences between animals in live weight at 600 days of age. | Higher EBVs indicate heavier live weight. |
| | MCW | kg | Genetic differences between animals in live weight of cows at 5 years of age. | Higher EBVs indicate heavier mature weight. |
| | Milk | kg | Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam. | Higher EBVs indicate heavier live weight. |
| Fertility | DtC | days | Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving. | Lower EBVs indicate shorter time to calving. |
| | SS | cm | Genetic differences between animals in scrotal circumference at 400 days of age. | Higher EBVs indicate larger scrotal circumference. |
| Carcase | CWT | kg | Genetic differences between animals in hot standard carcass weight at 750 days of age. | Higher EBVs indicate heavier carcass weight. |
| | EMA | cm ² | Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcass. | Higher EBVs indicate larger eye muscle area. |
| | Rib Fat | mm | Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcass. | Higher EBVs indicate more fat. |
| | P8 Fat | mm | Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcass. | Higher EBVs indicate more fat. |
| | RBY | % | Genetic differences between animals in boned out saleable meat from a 400 kg carcass. | Higher EBVs indicate higher yield. |
| | IMF | % | Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcass. | Higher EBVs indicate more intramuscular fat. |
| Feed/Temp. | NFI-F | kg/day | Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase. | Lower EBVs indicate more feed efficiency. |
| | Doc | % | Genetic differences between animals in temperament. | Higher EBVs indicate better temperament. |
| Structure | Claw Set | score | Genetic differences in claw set structure (shape and evenness of claws). | Lower EBVs indicate a better claw set. |
| | Foot Angle | score | Genetic differences in foot angle (strength of pastern, depth of heel). | Lower EBVs indicate a better foot angle. |
| | Leg Angle | score | Genetic differences in rear leg structure when viewed from the side (angle at front of the hock). | Lower EBVs indicate a lower score. |
| Selection Index | \$A | \$ | Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems. | Higher selection indexes indicate greater profitability. |
| | \$A-L | \$ | Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems. The \$A-L index is similar to the \$A index but is modelled on a production system where feed is surplus to requirements for the majority of the year, or the cost of supplying additional feed when animal feed requirements increase is low. While the \$A aims to maintain mature cow weight, the \$A-L does not aim to limit the increase in mature cow weight as there is minimal cost incurred if the feed maintenance requirements of the female breeding herd increase as a result of selection decisions. | Higher selection indexes indicate greater profitability. |

- Quarterback is a long, sound high IMF bull backed by an impressive stud producing cow family.
- He offers a great combination of short gestation length, birth to Growth spread, decent scrotal and high IMF.
- His calves are born light and early, are well structured with excellent Carcase traits.
- We used Quarterback to improve the Carcase potential of our cattle without sacrificing constitution.
- He stamps his sons with length.

- Bond is a strong bodied, high Growth AI sire with big EMA and breed leading Carcase Weight. He topped the USA's prestigious Midland Bull Test sale in 2021.
- His sire Connealy Confidence Plus has produced a multitude of AI sires.
- His dam is a truly great cow and is also the mother of Hoover No Doubt, one of the most sort after sirelines in America for his combination of foot quality, heavy fleshing and Growth. Unfortunately, No Doubt semen never made it to Australia but we have sampled a couple of his sons in Sterling Pacific and Baldrige Badger as well as using Bond.

- Stellar and his sons have topped numerous sales in the USA, highlighted by his grandson Connealy Craftsman topping at \$500,000.
- Calves are slick skinned and good footed, with excellent bodies and plenty of depth.
- Sitz describe him as the following – 'Stellar is a super thick topped deep sided bull that transmits added substance, fleshing ability, muscle shape, and is becoming recognized as one of the true quality foot improvers of the breed. The Stellar progeny have consistently performed very well at all levels. The daughters have excellent udders, and his progeny PAP test extremely well. A very well rounded bull that will produce real world cattle.'

- Quarter Pounder topped the 2022 Banquet sale at \$60,000, where he was well fleshed and quiet, with great eye appeal.
- He produces strong headed, stretchy cattle with plenty of growth and a good frame.
- He is the ideal sire for those looking to add extra frame, length and punch to their weaners.
- We were drawn to Quarter Pounder for his stout body, excellent fleshing and scrotal and strong Angus head.
- Furthermore we identified him as a sire bred for the physical attributes Banquet target, while maintaining a pleasing to the eye data set.
- We were fortunate enough to be part of the syndicate that purchased him.

| -0.7 | +2.9 | +0.48 | +0.84 | +0.9 | \$187 | \$338 | |

- Main Event is a free moving, long, clean fronted bull with impeccable structure.
- Upon arrival at Alpine he was assessed by Ian Moreland as straight 5's for structure and amongst the soundest bulls he had cast his eye over.
- Main Event has since proven to be one of the elite foot improvers in our herd. This year's sale further enhances this with half his progeny in this sale scoring 5s for feet.
- Main Event stems from arguably Karoo's most successful female line, Karoo Doris Y137. Full brother in blood to Main Event, Karoo Realist N278 was a high seller for Karoo and a semen sire for Breeder Genetics.
- Calves are born light, with great structure and grow out well.
- Main Event is the sire of our \$70,000 sale topper Alpine Rip Wheeler R144, a semen sire for Genetics Australia as well as Main Event Q192, also a semen sire for G.A.

- Ricochet is a big framed, powerful Baldrige 38 Special son with phenomenal Growth EBVs.
- He stands on very good feet and is a smooth mover.
- His sire 38 Special would be the best footed bull we have used from the USA, while his damsire Sitz Investment has produced our neatest uddered and highest production females.
- Added bonus is that 38 Special's dam, Baldrige Isabel Y69, is easily one of the breeds all time great producing females.
- With his combination of Growth, soundness and maternal prowess we retained R005 to use for ourselves.

- Q211 is a super thick, wide-topped Knockout son with exceptional disposition, scrotal, skeletal design and foot quality.
- This bull will have a significant impact on our herd.
- Sired by Karoo Knockout, amongst the most complete bulls we have used. Few bulls can match his ability to improve back leg flex while maintaining pastern angle and foot quality.
- Dam Alpine Lowan J110 was one of our soundest cows, decent framed with excellent feet.
- Q211's pedigree incorporates some of the Angus Breeds most exceptional sires - Karoo Knockout/Arrossan Equator A241/Vermillion Dateline/New Design.

- Real Deal was the \$90,000 high-seller in our Autumn 2022 bull sale.
- He is a high credentialled Carcase bull, exceptionally sound with decent frame and plenty of body.
- His EBVs offer an exceptional combination of Growth, EMA and IMF, combined with the basic fundamentals of cattle breeding such as docility, Scrotal, foot quality and fertility traits.
- His sire Rennylea N542 has topped sales wherever he has been used and is shaping as a sire of sires.
- Real Deal's dam, P354, conceived to Al her first three joinings before entering our donor program and the resultant sons have all been outstanding and amongst the high sellers in our last 3 Autumn bull sales. She is a descendant of one of Australia's most successful matrons in Coonamble's Bangadang Lowan A61.
- P354's two ET brothers, Alpine Elevator M268 and Alpine Muzza feature prominently throughout our herd with M268 topping our 2018 sale and producing a couple of sons over \$50,000 from limited progeny.

THE BULLS BEHIND THE COWS

We've always aimed to purchase high quality, sound functional bulls to run with our cows. Targeting specific sirelines out of the best performing cow families from programs of respected breeders has been our strategy. The following is a snapshot of some of the sires we've owned that form the backbone of our cow herd.

1.

5.

6.

2.

3.

1. LARGO FULL HOUSE

FC 5 / RC 5 / FA 6 / RA 5 / RS 5 / RH 5

This Coonamble Z3 son is one of the best we have used for foot quality and produces daughters that last. Out of the Dream family with grand dam Vermont Dream Y301 (168 progeny) and her daughters being responsible for a variety of Australian record breaking progeny.

2. HAZELDEAN HIGH ROLLER NHZH6

FC 5 / RC 5 / FA 6 / RA 5 / RS 5 / RH 5

An absolute favourite and worked up until 11 years of age. Daughters are docile and feminine. Sire TC Total and damsire LT Bando 9074 are absolute cowmakers. Dam Hazeldean A90 (22 progeny) also the dam of Dunoon herd sire Hazeldean Harlequin.

3. TEXAS HOLD'EM DXTH126

FC 6 / RC 5 / FA 6 / RA 5 / RS 5 / RH 5

Long bodied, sound Calving Ease sire out of a Coonamble Z3 son. The dam of Hold'em is Texas Undine Z183 (140 progeny), who along with her daughters have produced a myriad of Texas and Australian record priced progeny and literally millions of dollars in progeny sales.

4. KAROO KNOCKOUT NENK176

FC 6 / RC 6 / FA 5 / RA 5 / RS 5 / RH 5

A Matauri Realty son deep and thick and his daughters are the same. Interestingly his mother and grandmother are both by sons of one of Karoo's best cows in Raff Doris Y137 (63 progeny). Karoo Main Event and the AI sire Karoo Realist are both out of Y137 daughters.

5. STERITA PARK BLACK JACK SPLJ231

FC 6 / RC 6 / FA 5 / RA 5 / RS 5 / RH 5

This imported ET son of Connealy Forward produced moderate framed high-growth cattle with low mature-cow weights. A daughter produced our \$70,000 Alpine Rip Wheeler R144. Black Jacks dam Sydgen Forever Lady 4413 (67 progeny) was also the dam of AI sire Sydgen Trust who produced close to 6,000 registered progeny here and in the USA.

6. BOWMONT JACKPOT SRKJ310

FC 5 / RC 5 / FA 6 / RA 5 / RS 5 / RH 5

An Ardrossan Equator A241son, exceptionally sound and a producer of angular, long fronted daughters. Granddam V9 (22 progeny) is the dam of Ardrossan Direction X3 and Connection X15, two top AI sires of their day with over 6,000 registered progeny between them.

7. ALPINE ELEVATOR CGKM268

FC 5 / RC 5 / FA 6 / RA 5 / RS 5 / RH 5

Along with his full brother Muzza these two Elevator sons have left an exceptional line of docile females, not to mention M268's high-selling bulls. Their sister is the granddam of Real Deal who sold for \$90,000. Their great granddam Lowan A61 (113 progeny) female line is the cornerstone of Coonambles program.

8. COONAMBLE JUNIOR WDCJ266

This Regent son produces long, well fleshed cattle. His dam Lowan A61 and daughters have produced countless stud sires. Full brothers to Junior include Jester and Handyman who has worked so well at Texas. A daughter of A61 is the dam of Coonamble Hector, sire of Australia's record priced female. Unfortunately we didn't own Junior but his daughters are well represented.

RODWELLS

LOCAL SERVICE NATIONAL STRENGTH

It's a trust thing

Representative, negotiator, ally, and mate – this is a relationship business.

At Rodwells we are known for our team of local, experienced, independent livestock specialists and property agents across Victoria, New South Wales and South Australia.

Backed by the strength of a national network, our Rodwells agents deliver the most effective solution tailored for your livestock. Our knowledge and experience in local markets and seasonality means that you can trust us to deliver the highest standard of service.

And as part of the Ruralco group of businesses, we are able to draw on the resources of Ruralco Property, providing real estate agency services in both rural and residential markets, as well as a comprehensive property management service.

Our agents have access to up-to-the-minute market intelligence, including market trends and performance statistics, and are committed to securing successful buying and selling results for their clients.

Whatever your livestock or property needs, we are confident our service offering provides the best possible outcomes at all levels of the industry supported by our ethos of Local Service, National Strength.

UNDERSTANDING THE TRANSTASMAN ANGUS CATTLE EVALUATION (TACE)

What is the TransTasman Angus Cattle Evaluation?

The TransTasman Angus Cattle Evaluation is the genetic evaluation program adopted by Angus Australia for Angus and Angus influenced beef cattle. The TransTasman Angus Cattle Evaluation uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcass, fertility).

The TransTasman Angus Cattle Evaluation is an international genetic evaluation and includes pedigree, performance and genomic information from the Angus Australia and Angus New Zealand databases, along with selected information from the American and Canadian Angus Associations.

The TransTasman Angus Cattle Evaluation utilises a range of genetic evaluation software, including the internationally recognised BLUPF90 family of programs, and BREEDPLAN® beef genetic evaluation analytical software, as developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

What is an EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

Using EBVs to Compare the Genetics of Two Animals

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. ≈ 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcass than a bull with an IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Using EBVs to Benchmark an Animal's Genetics with the Breed

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals recorded with Angus Australia.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV

can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes.

For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

Considering Accuracy

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

Description of TACE EBVs

EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcass merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following page.

There are many ways to participate in the Alpine Spring Bull Sale.

BACKED BY ALPINE'S COMPREHENSIVE QUALITY ASSURANCE PROGRAM

- Independent structural assessment of sale bulls pre-sale by Ian Moreland from Studcare Genetics.
- Independent semen quality test pre-sale has been conducted by Haydn Shipard.
- Alpine Backup Service (see Sale Information)

• PRE-SALE INSPECTION SUNDAY 15 SEPTEMBER

Preview the sale lineup on Sunday 15 September 11am–3pm.

• PREVIEW BY APPOINTMENT

Preview the sale lineup by appointment with Chris Oswin mobile 0427 562 254.

• ATTEND THE SALE

Attend the sale on 18 September in person – sale bulls will be on display from 10am. Refreshments and beef lunch provided.

• BID ONLINE YOURSELF

Bid online yourself via *AuctionsPlus* – please register as soon as you can to allow enough time to become familiar with how things work! www.auctionsplus.com.au

• BID ONLINE WITH ASSISTANCE

Bid online with assistance from your local agent at their office.

• BID VIA PHONE HOOKUP

To arrange to bid via phone hookup, please contact either Auctioneer Peter Godbolt 0457 591 929 (*Nutrien Stud Stock*) or Selling agents Dan Ivone 0427 480 548 and Wade Ivone 0487 233 208 (*Nutrien Ivone Agencies*) or Mick Curtis 0428 953 222 and Scott Meehan 0428 952 536 (*Rodwells*)

AFTER SALES SERVICE AND MANAGEMENT OF BULLS

BUYING A BULL IS AN INVESTMENT. THIS INVESTMENT SHOULD CONTRIBUTE TO THE GENETICS AND SALE INCOME OF YOUR HERD FOR MANY YEARS. IF YOU ARE TO GET THE MOST FROM YOUR NEW BULL, IT PAYS TO LOOK AFTER HIM WELL, ESPECIALLY IN THE FIRST SEASON OF USE.

OUR QUALITY ASSURANCE

All Sale bulls must complete the following before being deemed suitable to be offered for sale:

- Semen quality test and physical inspection by Haydn Shipard.
- Independent structural assessment by Ian Moreland from Studcare Genetics.
- All bulls sire verified.
- Performance recorded HBR or APR with Angus Breedplan.
- 7 in 1 vaccination (2 initial and then annually).
- Vibrio vaccination (2 initial and then annually).
- Sale bulls drenched just prior to sale day. Please refer to the NVD.
- Pestivirus ear notch test negative PI plus Pestiguard vaccination (2 initial and then annually).

ALPINE BACK UP SERVICE

As our Quality Assurance program outlined above demonstrates Alpine Angus have made every effort to ensure Alpine Sale Bulls leave Alpine as fully functional bulls fit and ready to go straight to work!

The sale of a bull we regard as the beginning of a 'relationship' with our clients rather than the end of a 'deal'.

As our many long term clients will attest Alpine Angus have worked hard over 25 years to service our clients however we can – particularly when things go wrong! Depending on the situation and circumstances various solutions may apply including the loan of a bull; a suitable replacement bull or a full or part credit. Our promise is to work with our clients to find the best solution.

***Please contact us if any problems arise as we endeavour to have spare bulls on hand throughout the joining season to assist clients with injury or other issues.**

ARRIVAL OF YOUR NEW BULL

Please bear in mind, when working bulls through the yards, handle them with care. Preferably work them with other cattle and do not use force. Bulls can become

upset and excited in the sale and delivery process. They are subjected to strange yards, different noises, loss of their mates, different people, different handling methods, trucking, unloading, new paddocks and different water and feed. This can upset animals, which are normally very quiet.

When the bull arrives home, unload him at the yards into a group of house cows, steers or herd cows. Never jump the bull from the back of a truck into a paddock. Bulls from different origins should be put into separate yards with other cattle, steers or cows, for company.

Provide hay and water, and then leave the bull alone until the next day.

All bulls should be drenched for worms every six months with a dectin drench.

In addition they may need a drench for fluke if necessary and to be treated for lice. The following annual vaccinations are recommended:

- 7-in-1 vaccine annually.
- vibriosis vaccine annually.
- Pestiguard vaccination annually.

Give particular attention to preventing new bulls bringing vibriosis into a herd. Vibriosis is a sexually transmitted disease that causes infertility and abortions and is most commonly introduced to a clean herd by an infected bull. Vaccinated bulls are free from vibriosis so vaccinating bulls against the disease should be routine practice. All Alpine Angus bulls are vaccinated.

MATING BULLS

For an efficient production system we recommend a 6–8 week joining season.

Newly purchased young bulls should not be multiple joined with older herd bulls. They will not be allowed to work much and in keeping them away from the cows, the older, dominant bull will knock them around.

Use new bulls in either single sire groups or with other young bulls their own age. If a number of young bulls are to be used together, run them together for a few weeks before joining starts. They sort out their pecking order quickly and have few problems later.

Ensure all bulls used are in good condition prior to working – condition score 3 is ideal. Remember bulls that are too light or heavy in condition may have problems with libido and semen production.

Yearling bulls are still growing strongly,

so tend to be leaner, carrying less body fat reserves. The condition of the yearling bulls is critical. If they drop below condition score 3, sperm production may be impaired.

Service Ability Testing is recommended on all bulls prior to joining.

All working bulls should be tested or checked before joining for physical soundness, testical tone and serving ability.

All bulls to be used must be free moving, active and in good store condition. Bulls may need supplementary feeding before the joining season to bring them up to condition score 3. The Australian Association of Cattle Veterinarians (AACV) defines a normal, fertile bull as 'expected to get 90% of 50 normal, cycling, disease-free females pregnant within 9 weeks, and 60% of these should become pregnant in the first three weeks of joining'. This expectation would apply to 2-year-old bulls, but not to younger bulls.

DURING MATING

Whilst generally all goes to plan we believe a proactive approach is best to ensure you get the best result.

We strongly recommend that you keep a close eye on the bulls if possible when joining. Even though we have performed a service ability test and had your bulls independently structurally assessed bulls are animals and things can still go wrong. Check bulls at least twice each week during joining. Get up close to them and see each bull walk; check for swellings around the sheath and for lameness. Watch them work if possible. A significant number of cows or heifers bulling after 6 weeks of joining may indicate there is a problem. Young bulls are particularly vulnerable in their first season. Common problems that can occur are;

- They may not have built up immunity to IBR (the cattle form of herpes – making it painful to insert the penis).
- or may be more prone to a fever event through the stress of working, new surroundings and establishing their rank-ing with other bulls. This can render them temporarily infertile for a six week period.
- Problems such as warts on the penis will mean that the bull will need to be attended to.
- Pay particular attention to any sign of abnormal serving problems like 'cork-screw penis'.
